Ultra-thin solid laminate worksurfaces

Zenith

Collection

Offering an ultra-thin worksurface solution, which can be shaped and styled on site thanks to its solid core, not to mention it's Enhanced Performance Technology making it even more hard wearing than traditional laminate surfaces, our brand new Zenith Collection has it all.

With a stunning range of decors to choose from, each with design enhancing surface textures and a beautiful solid black core, this is a worksurface solution without limits – so let it peak your imagination!

Why choose a Zenith worksurface?

- The 12.5mm ultra-thin appearance creates the most contemporary and cutting edge design statement.
- Its extra black solid core offers complete design flexibility to incorporate curves without the need for re-edging.
- Being 100% waterproof allows under mount sink installation as well as drainer grooves.
- The double sided decorative surface makes it ideal for cabinet framing, breakfast bar waterfall sides and co-ordinated shelving.
- Ready to install on site with standard tooling, avoids fitting complexity time and cost.
- Enhanced Performance Technology provides a superior worksurface that is as reliable as it is stunning.
- Realistic and sensual surface textures to enhance designs.
- A cost effective alternative to artificial stone.

Surface Finishes

The surface finish can transform a decor and bring it to life, with 3 great textures incorporated through the range, the decors look and feel more realistic than ever.

Roche (RO)

The depth of slate and concrete, highlighted by an embossed matt relief which gives them a sensual touch beyond compare.

Granite (GR)

Decors full of character, brought to life by a granite-like, subtle satin structure for a raw material sensation.

Linimat (LM)

Long veins, blended or contrasted, emphasised by a linear, flat structure which restores the authenticity of the wood.

How is your Zenith worksurface made?

-
- Square edge
 - Self-supporting
 - Machinable through its thickness
 - 12.5mm solid core laminate worksurface
 - High Resistance Overlay
 - Decorative sheet, identical on both sides
 - Extra black core made up of layers of kraft paper

Creating the Zenith bespoke look

Apart from its ultra-thin appearance making it the most contemporary and cutting edge worksurface choice, Zenith also offers a host of other design enhancing features for complete flexibility to create a design exactly suited to your space. The best bit is, it can all be done on-site without the cost and time of templating.

Under mount sinks

Zenith is the ideal material for fitting under mount sinks thanks to its 100% waterproof solid core. A great & practical way to finish the look is the addition of drainer grooves, which are easily machined on site.

Curves

Incorporate the sleek flow of curves for a truly stunning finish to any design. With no re-edging required thanks to the solid black core, external curves can easily be incorporated on site, or utilise our pre-curved corner module for an incredibly simple internal curve solution.

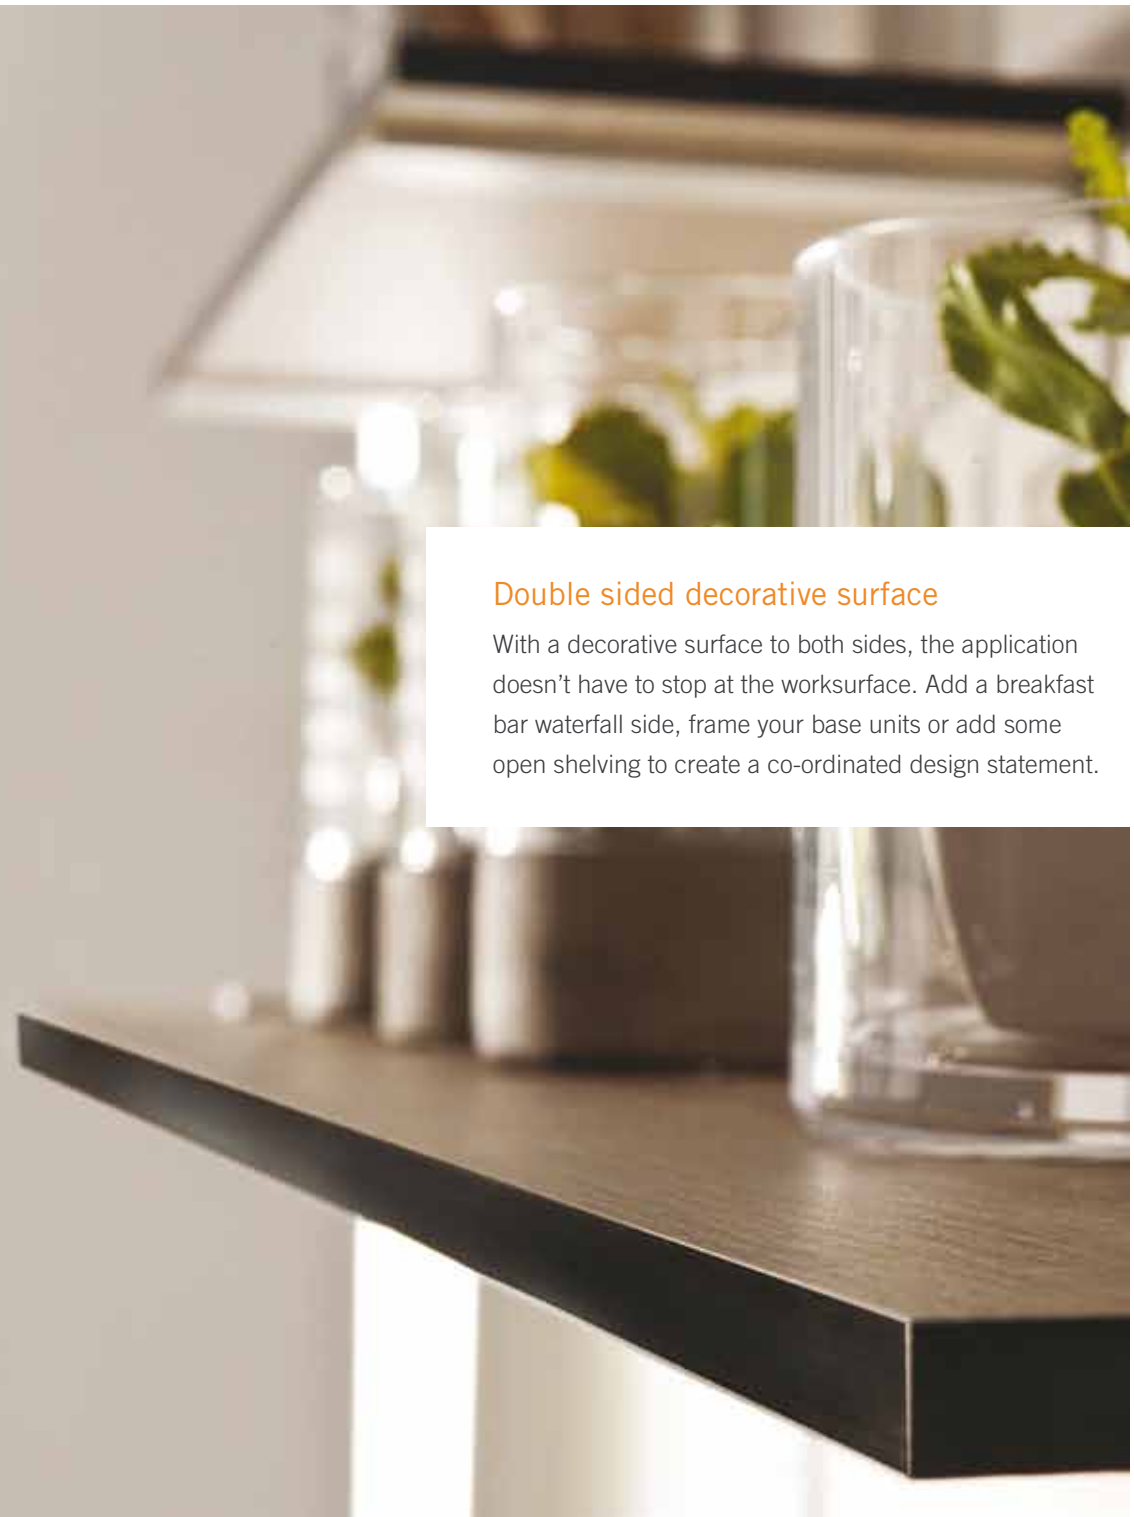

Accessories

Highly practical and easy to fit, our Zenith range also includes co-ordinating splashbacks and upstands that allow you to continue your chosen design from worksurface to wall. The end result speaks for itself - and offers a great alternative to tiling.

Double sided decorative surface

With a decorative surface to both sides, the application doesn't have to stop at the worksurface. Add a breakfast bar waterfall side, frame your base units or add some open shelving to create a co-ordinated design statement.

Enhanced Performance Technology

Enhanced Performance Technology provides superior performance against heat, wear, water and impact* assuring a worksurface that is as reliable as it is stunning.

Water resistant**
100% waterproof

Resistance to water, steam, stains and chemical products.

Impact resistant**
500g impact

Resistance to impact up to 500g from 2m maximum drop (excluding sharp objects).

Wear resistant**
400 revs

Resistance to abrasion up to 400 revolutions in the Taber Abraser test.

Heat resistant**
220°C heat

Resistance to high temperatures up to 220°C (for 10min).

*The additional performance provided from Enhanced Performance Technology does not replace standard care and maintenance and precautions should still be utilised in the form of heat protectors and chopping boards to avoid damaging the surface. **Tested to EN438 standards.

Quality

All Zenith surfaces conform to EN standards, through ISO 9001:2008 business management systems. Our site is a safe, healthy place to work too, conforming to BS EN ISO 19001:2007 through the Occupational Health and Safety system (OHSAS). We are also supported by the BM TRADA Certification Body – an organisation that provides independent certification, testing, inspection, training and technical services around the world.

As holders of the furniture and kitchen industry's top quality FIRA GOLD certification, you can be confident your Zenith surface is of a consistently high standard.

'Surfaces as reliable as they are stunning'

Sanitized®

All of our Zenith worksurfaces are technologically advanced and super-hygienic. They are treated with Sanitized® antibacterial hygiene function that destroys more than 99% of bacteria in just 24 hours.*

*This does not replace general cleaning or food hygiene. Active biocidal substance: silver ions.
